● [Portfolio website](#)

me

A personal portfolio website created with **HTML, CSS, and JavaScript** showcases your skills, projects, and professional background in a clean, organized way.

- **HTML** is used to structure the pages, including sections like *About Me*, *Skills*, *Projects*, *Resume*, and *Contact*.
- **CSS** styles the layout with colors, spacing, and responsive design to ensure the site looks good on all devices.
- **JavaScript** adds interactivity, such as animated menus, project filters, smooth scrolling, form validation, or dynamic content.
